1 About Demeter

In ancient Greek religion and mythology, Demeter is the Olympian goddess of harvest and agriculture, presiding over grains and the fertility of the earth. She was also called Deo. Though Demeter is often described simply as the harvest goddess, she also presided over the sacred law and the cycle of life and death.

Demeter was often considered to be the same figure as the Anatolian goddess Cybele, and she was identified as the Roman goddess Ceres. In the Ceres ecosystem, Demeter is the first airdrop with its own purpose, DeFi (farming) platform and Play-to-Earn game.

2 Tokenomics

Symbol:	Chain:	Max supply:
DEO	SORA	10,000,000.00

Maximum starting supply:
120,500.00

11,735.25 DEO - **To be burned**

Real starting supply:
108,764.75 DEO

- 88,764.75 DEO - **Airdropped to CERES holders**
- 10,000 DEO - **Distributed to SORA's Kusama parachain auction participants**
- 10,000 DEO - **Provided liquidity on Polkaswap**

EMISSION RATE:

Time	Emission/block	Emission/day
First 90 days (3 months)	1 DEO/block	14,400
Till the end of farming	0.5 DEO/block	7,200

3 Demeter Farming Platform

REWARD DISTRIBUTION

DISTRIBUTED TO (%)

Farms	60%
Staking	36%
Team	4%

FARMING PAIRS

- First 5 days**
- XOR/DEO - DEO reward
 - XOR/CERES - DEO reward

After 5 days will be added

- XOR/DAI - DEO reward
- XOR/ETH - DEO reward
- XOR/DAI - XSTUSD reward
- XOR/ETH - XSTUSD reward

STAKING

- First 5 days**
- DEO - DEO reward

After 5 days will be added

- CERES - DEO reward
- XSTUSD - DEO reward

FARMING PAIR	DEPOSIT FEE	DISTRIBUTION OF FEE
XOR/DEO - DEO	2%	45% DEO Burning 35% Ceres Burning 10% Treasury 10% Team
XOR/CERES - DEO	2%	45% DEO Burning 35% Ceres Burning 10% Treasury 10% Team
XOR/DAI - DEO	4%	45% DEO Burning 35% Ceres Burning 10% Treasury 10% Team
XOR/ETH - DEO	4%	45% DEO Burning 35% Ceres Burning 10% Treasury 10% Team
XOR/DAI - XSTUSD	1%	45% DEO Burning 35% Ceres Burning 10% Treasury 10% Team
XOR/ETH - XSTUSD	1%	45% DEO Burning 35% Ceres Burning 10% Treasury 10% Team

STAKING	DEPOSIT FEE	DISTRIBUTION OF FEE
DEO	2%	100% DEO Burning
CERES	4%	Farming fee distribution
XSTUSD	4%	Farming fee distribution

***all new farming pairs will have a 4% deposit fee with the same fee distribution(45% DEO Burning, 35% Ceres Burning, 10% Treasury, 10% Team)**

All liquidity providers in the Demeter farming pools will get the PSWAP rewards as before. Additionally, liquidity providers won't give their liquidity to the Demeter platform, as is the case on EVM-based and BSC networks, for example, where LP tokens are given to smart contracts. On the Demeter platform you only need to grant permission to use your liquidity pool tokens to farm DEO tokens. This farming method provides your funds more security.

Educate yourself before you start farming, because you are doing that at your own risk.

4 DEO Arena

DEO Arena is the first Play-to-Earn game on the SORA network, and among the first in the DotSama ecosystem. The XOR-native token Demeter (DEO) is the in-game currency. In the Beta version, the game is only available as a Player-vs-Player (PVP) game, and later the main Battle Royale mode (with more players in the same arena) will be added.

Players are spawned in the arena and the goal is to eliminate their opponent using various weapons (pistol, rifle, hammer, sword, bomb...). Each player must enter the match with some DEO tokens, and the winner gets 87.5% of the match prize pool, 12.5% is burnt and distributed to referrals. Referral rewards are distributed from the part of the game destined to be burnt (12.5% of total DEO invested), and those rewards are distributed for each game played, regardless if your referral player wins or loses.

Points gained are used to decide the Season Leaderboard. Each season of the DEO Arena League lasts 4 weeks. The minimum prize pool for the first season is \$20,000 in XOR.

5 FAQ

Q. How to get the Demeter airdrop?

A. Every Ceres token holder who holds on the SORA network (PolkadotJS wallet) will get a Demeter token airdrop. If you hold your Ceres token on an ERC-20 network, or on any centralized exchange, you won't be eligible for the Demeter airdrop. Also, all XOR/CERES trading pair liquidity providers on Polkaswap are eligible for the Demeter airdrop.

Q. When will the Ceres team take the Demeter snapshot?

A. The Demeter snapshot was taken in December 2021/January 2022. Notifications were published on the Ceres app, the Ceres Announcements Telegram channel, and on our official Twitter account. During that period, users were able to transfer their Ceres tokens to the SORA network (using the HASHI bridge) and participated in the Demeter airdrop.

Q. What is the minimum amount of Ceres tokens I have to hold to qualify for the Demeter airdrop?

A. There is no minimum or maximum amount of Ceres tokens required to qualify for the Demeter airdrop.

Q. Why do only Ceres holders on the SORA network qualify to receive the Demeter airdrop?

A. The entire Ceres ecosystem and Demeter platform are being built on the SORA network. SORA is both a new economic system that decentralizes the concept of a central bank as well as a network that implements a new way to architect a parachain blockchain that connects to the Polkadot relay chain and ecosystem with in-built tools focused on DeFi. The SORA Network excels at providing tools for decentralized applications that use digital assets.

Q. How many Demeter tokens will I get for 1 CERES token?

A. For every CERES token, every holder will receive 5 Demeter tokens.

Q. What is the listing price of Demeter?

A. The listing price for 1 Demeter on Polkaswap will be approximately \$10.

Q. What is the purpose of the Demeter?

A. Demeter tokens will be used for farming, staking, providing liquidity, platform fees, and as the in-game currency of the first Play-to-Earn game on the SORA network, DEO Arena.

Q. What is the Demeter token's maximum starting supply?

A. The maximum starting supply will be 120,500 Demeter tokens, and all undistributed Demeter tokens will be burned.
